## DETAILED ACTION

### *Election/Restrictions*

Linking claims 43, 54, 63 and 66 are allowed. Since the restriction requirement among inventions I-VI, as set forth in the Office action mailed on 23 September 2002, was conditioned on the nonallowance of the linking claim(s), **the restriction requirement as to the linked inventions is hereby withdrawn**. The nucleic acid sequences previously withdrawn from consideration as a result of the restriction requirement are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement as to the linked inventions, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### *Petition to Correct Inventorship*

Although the Office records presently acknowledge Manfred Theisen as an inventor on the instant application, the examiner is unable to find a reply to the petition to correct inventorship filed 30 April 2003 in the image file. Therefore, the following response is provided to clarify the record.

In view of the papers filed 30 April 2003, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the

Art Unit: 1636

inventorship, and accordingly, this application has been corrected in compliance with 37

CFR 1.48(a). The inventorship of this application has been changed by the addition of inventor Manfred Theisen.
